

Dear : Fadiel Razkalla,

Aubert Appraisal Services, LLC., has prepared an appraisal report of the property located at 616 Lenwood Dr Slidell, LA 70458.

The intended user of this appraisal report is Fadiel Razkalla.

The purpose of this appraisal is to estimate the market value of the property described in the body of this report.

This is an Appraisal Report which is intended to comply with the reporting requirements set forth under Standards Rule 2-2(a) of the Uniform Standards of Professional Appraisal Practice of the Appraisal Foundation.

The acceptance of this appraisal assignment by the appraiser was not based on a requested minimum valuation, or the approval of the loan. This appraisal has been prepared to conform with the Uniform Standards of Appraisal Practice ("USPAP") adopted by the Appraisal Standards Board of the Appraisal Foundation. The appraiser has disclosed within this appraisal report steps taken that were necessary or appropriate to comply with the competency provision of the USPAP.

As per current FIRREA minimum appraisal standards, I have completed previous appraisals of single family residences in this area. An appraisal inspection of the appraised property, a study of pertinent factors including recent sales and active listings, valuation trends, and the general neighborhood data led us to the conclusion that the market value, as of 12/23/2024, is:

\$150,000.00

It has been a pleasure to assist you. If we may be of further service to you in the future, please let us know.

Respectfully submitted,

Luis Aubert

Re: Property: 616 Lenwood Dr
Slidell, LA 70458
Borrower: N/A
File No.: L10102508

Opinion of Value: \$ 150,000
Effective Date: 12/23/2024

In accordance with your request, we have appraised the above referenced property. The report of that appraisal is attached.

The purpose of the appraisal is to develop an opinion of market value for the property described in this appraisal report, as improved, in unencumbered fee simple title of ownership.

This report is based on a physical analysis of the site and improvements, a locational analysis of the neighborhood and city, and an economic analysis of the market for properties such as the subject. The appraisal was developed and the report was prepared in accordance with the Uniform Standards of Professional Appraisal Practice.

The opinion of value reported above is as of the stated effective date and is contingent upon the certification and limiting conditions attached.

It has been a pleasure to assist you. Please do not hesitate to contact me if I can be of additional service to you.

Sincerely, esign.alamode.com/verify Serial:1ACF3EB2

TRANSFER HISTORY	My research <input type="checkbox"/> did <input checked="" type="checkbox"/> not reveal any prior sales or transfers of the subject property for the three years prior to the effective date of this appraisal.					
	Data Source(s): Corelogic Public Records					
	1st Prior Subject Sale/Transfer	Analysis of sale/transfer history and/or any current agreement of sale/listing: No prior sales noted on the subject or comparable sales for 36 months prior to the effective date of this report.				
	Date: None Reported					
	Price: N/A					
	Source(s): Corelogic Public Records					
	2nd Prior Subject Sale/Transfer					
	Date: N/A					
	Price: N/A					
	Source(s): N/A					
MARKET	Subject Market Area and Marketability: Typical marketing times for similar properties within the subject's market area are between 90 and 180 days.					
SITE	Site Area: 9369 sf	Site View: N;Res;	Topography: Flat	Drainage: Typical		
	Zoning Classification: S-1	Description: Single Family Residential				
	Zoning Compliance: <input checked="" type="checkbox"/> Legal <input type="checkbox"/> Legal nonconforming (grandfathered) <input type="checkbox"/> Illegal <input type="checkbox"/> No zoning					
	Highest & Best Use: <input checked="" type="checkbox"/> Present use, or <input type="checkbox"/> Other use (explain) _____					
	Actual Use as of Effective Date: Single Family Residential	Use as appraised in this report: Single Family Residential				
	Opinion of Highest & Best Use: Single Family Residential					
	FEMA Spec'l Flood Hazard Area <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No FEMA Flood Zone C	FEMA Map # 2252050410D FEMA Map Date 4/21/1999				
	Site Comments: The subject site is typical in terms of size and market appeal for the area. No encroachments or other adverse conditions were noted, however, we suggest that a survey be completed to determine if any exist.					
IMPROVEMENTS	Improvements Comments: C4;No updates in the prior 15 years;The overall condition of the subject property is "Average" and in condition consistent with the UAD condition rating of "C4". No updates noted to the subject's kitchen or baths within 15 years prior to the effective date of this report.					
RECONCILIATION	Indicated Value by: Sales Comparison Approach \$ 150,000.	Indicated Value by: Cost Approach (if developed) \$ N/A	Indicated Value by: Income Approach (if developed) \$ N/A			
	Final Reconciliation	All three approaches to value were considered for this report. The market and cost approaches were developed. However, most consideration was given to the market approach. The income approach was not used because the area is primarily owner occupied. The cost approach is typically used and most accurate for new constructions or nearly new constructions and was not included in this report. See Advisory Opinion 28, Scope of Work Decision, Performance, and Disclosure, for further guidance. Final Reconciliation. Many comparable closed sales were considered in making this appraisal. The (3) closed sales displayed are considered to be the most comparable and the best indications of value for the subject property. Most weight is given to Comparable number sale 2 because it requires the least gross dollar adjustments, and is most similar to the subject. Comparable sale 1 required the second least gross dollar adjustments, and is second most similar to the subject. Comparable 1 is the second highest weighted comparable sale. Comparable sale 3 requires the most gross dollar adjustments and is least similar to the subject, and has been weighted the least of the three selected comparables. A weighted based analysis has been used to reconcile the final estimated value of the subject property. The comparables have been weighted as follows; Comparable 1. 33%, Comparable 2. 47%, and Comparable 3. 20%.				
	This appraisal is made <input checked="" type="checkbox"/> "as is", <input type="checkbox"/> subject to completion per plans and specifications on the basis of a Hypothetical Condition that the improvements have been completed, <input type="checkbox"/> subject to the following repairs or alterations on the basis of a Hypothetical Condition that the repairs or alterations have been completed, <input type="checkbox"/> subject to the following required inspection based on the Extraordinary Assumption that the condition or deficiency does not require alteration or repair: No mechanical or structural warranties are expressed or implied herein, information taken form the MLS is considered reliable.					
	<input type="checkbox"/> This report is also subject to other Hypothetical Conditions and/or Extraordinary Assumptions as specified in the attached addenda.					
	Based on the degree of inspection of the subject property, as indicated below, defined Scope of Work, Statement of Assumptions and Limiting Conditions, and Appraiser's Certifications, my (our) Opinion of the Market Value (or other specified value type), as defined herein, of the real property that is the subject of this report is: \$ 150,000, as of: 12/23/2024, which is the effective date of this appraisal. If indicated above, this Opinion of Value is subject to Hypothetical Conditions and/or Extraordinary Assumptions included in this report. See attached addenda.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been very recently constructed and have not previously been occupied. The entire structure and all components are new and the dwelling features no physical depreciation.*

*Note: Newly constructed improvements that feature recycled materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100% new foundation and the recycled materials and the recycled components have been rehabilitated/re-manufactured into like-new condition. Recently constructed improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (i.e., newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category either are almost new or have been recently completely renovated and are similar in condition to new construction.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure.

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.

Public Record Discrepancy

All information for comparable sales has been retrieved from the NOMAR MLS. All GLA and site sizes have been verified, and are correct as listed in this report.

The subject not having gutters is typical for this area and has no negative effect on the marketability of the subject.

All adjustments have been rounded to the nearest 100th

An adjustment for chronological age is not typically made in this market when an adjustment has been made for condition.

The type of financing the borrower is utilizing does not have an effect on the value of the subject or comparables selected for this report. An adjustment is not deemed necessary for this category and a zero has been placed in the adjustment column for comparables with different types of financing.

A plat map was not available for the subject property at the time this appraisal was performed.

Across the Board Adjustment

The appraiser was unable to locate a closed sale within the past 12 months which can bracket the subject's GLA on the low end, within a one mile radius of the subject, that could reasonably be considered comparable to the subject. Because of this, an across the board adjustment was necessary for GLA. The subject is not considered under built for the area because there are other properties in the immediate neighborhood which can bracket the subject's GLA on the low end. Only, none have sold within the last 12 months or are currently listed. The subject's GLA does not have a negative effect on the marketability of the subject. Expanding the search radius any further would go outside the subject's market area, and would not produce good indicators of value for the subject.

Condition Adjustment

Condition adjustments were made to comparable sales 1 and 3. Based on MLS photos and description, and exterior/drive-by inspections comparable sale 1's condition meets criteria consistent with the UAD rating of C3 and comparable sale 3's condition meet criteria consistent with the UAD condition rating of C5. The appraiser has utilized the matched pairs analysis method to determine condition adjustments. The appraiser has based the adjustments on similar sales meeting criteria consistent with the UAD condition rating of C4, versus that of comparable sales meeting criteria consistent with the UAD condition ratings of C3 and C5. After factoring out other dissimilar features, the appraiser's research has shown that properties within the subject's market area that sold within the past 12 months of the effective date of this report in C3 condition sold for approximately \$27.00 per sq.ft. rounded higher than those in C4 condition and has also shown that properties sold in C5 condition sold for approximately \$20.00 per sq.ft. rounded lower than those in C4 condition. Condition adjustments have been applied to comparable sale 1 at \$27.00 per sq.ft. rounded and adjustments have been applied to comparable sale 3 at \$20.00 per sq.ft. rounded.

The method used for GLA, Bath and All adjustments is the Historic Match Pair Analysis Method. In using this method, the appraiser isolates one variable at a time and attempts to extract the market reaction for that variable from the market.

Local MLS Source

MLXCHANGE Gulf South Real Estate Information Network Inc./NOMAR MLS.

The office of Aubert Appraisal Services is located less than 30 miles from the subject.

Compliance

I certify, as the appraiser, that I have complied with the Home Valuation Code of Conduct in all aspects of the appraisal process

Site Adjustment

Site adjustments made in the market comparison were based on what buyers are paying for land in this particular neighborhood. The extraction method derived values ranging from \$39,700 to \$78,400. A mean value of \$59,000 is estimated to be the site value of the subject property. After careful analysis the appraiser estimates site value in this neighborhood at approximately \$2.10 per square foot. This value was then multiplied by the difference of each the comparables lot size, compared to the subject property's. These values were then divided by each of the comparables sales prices, creating a land to improvements percentage. The percentages of all comparables were then analyzed, and the mean value of 0.29 or 29% was selected as the land to improvements percentage. The difference between each comparables lot size and the subject properties lot size, was then multiplied by the estimated price per square foot (\$26.33), and then multiplied by Land to improvements percentage (0.29), to derive each site adjustment.

MLS/Deedfax

Data deemed reliable but not guaranteed. The appraiser cannot obtain information through local public records. For this reason the appraiser has used extraordinary assumptions for all comparable details and specs listed herein. While most information concerning property transactions is available for public access, Louisiana considers the sale value to be private and confidential information. However, they do provide property information and ownership transfers with loan amounts and /or mortgages transfers taxes. Louisiana remains a non disclosure state as of the effective date of this appraisal.

Format Explanation

This report format is an appraisal report. The analysis is intended to comply with the reporting requirements set forth under Standards Rule 2-2 of the Uniform Standard of Professional Appraisal Practice for a summary report. As such, it presents only summary discussions of the data, reasoning, and analyses that were used in the appraisal process to develop the appraiser's opinion of value. Supporting the documentation concerning the data, reasoning and analysis is retained in the appraisers file.

Appraisal Process

The following pages contain a brief description of the subject property followed by a list of comparable properties considered within the analysis. Limiting Conditions of this report are contained in the addendum and should be considered in conjunction with this analysis. The appraisers Certification is also located within the addendum.

Scope of Work

The scope of the appraisal is defined as the extent of the purpose of collecting, confirming and reporting data. Data is collected and confirmed from the Clerk of Court Records, Multiple Listing Services, Published Data bases such as Deedfax, the appraiser's files and interviews with knowledgeable persons in local the local market. This data is then reported on the attached report in accordance with the Uniform Standards of Professional Appraisal Practice. The Analysis and Conclusion is written such that the reader, if generally knowledgeable in the appraisal process, should be able to follow the reasoning and judgment of the appraiser.

Extent to Which Property is Identified

I viewed the interior and exterior of the property. I have relied on the Saint Tammany Assessor's Office for the legal description and owner of public record.

Supplemental Addendum

File No. L10102508

Borrower	N/A					
Property Address	616 Lenwood Dr					
City	Slidell	County	Saint Tammany	State	LA	Zip Code
Lender/Client	Fadiel Razkalla					70458

Extent To Which the Property is Inspected

I have viewed the subject property on 10/09/2025.

Type and Extent of Data Research

In order to arrive at an opinion of the market value of the subject property. I researched data on comparable land and improved sales and construction cost, confirmed all comparable sales information, and analyzed the information gathered in applying the cost and comparison sales approach.

Type and Extent of Analysis Applied

The value opinions presented in this report are based upon review and analysis of the market conditions affecting real property value, including land values, cost and depreciation estimates, the attributes of competitive properties, and sales data for residential properties.

Purpose of The Appraisal

The purpose of the appraisal is to estimate the market value of the real estate, as of 10/09/2025 Market Value is defined below:

Definition of Market Value

"Market Value" is defined by the United States Treasury Department, Comptroller of the Currency 12 CFR part 34.43 (f) as, "The most probable price a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

1. Buyer and seller are typically motivated;
2. Both parties are well informed or well advised, and acting in what they consider their own best interests;
3. A reasonable time is allowed for exposure in the open market;
4. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
5. The Price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Comparable Selection

A thorough search was made to find comparables most similar to the subject property. The factors in determining the best comparables are as follows: Size of living area, quality of construction, lot size, condition, distance/location, and amenities. The comparables selected for this report are considered the best available indicators of the subject's value at the time of this assignment. The closed sales were carefully selected and are considered to be the most comparable and best indicators of value for the subject property. Final estimate is derived from the weighted gross adjustments of the comparables. Bracketed figures reflect a value range between (\$120,300) and (\$163,100). Final value for the subject property is **(\$150,0150,000)** rounded.

Summary of Sales Comparison Approach to Value

The living area was adjusted at \$40.00 a sq.ft. rounded which is based upon a market analysis of price per square foot of competitive properties. Car storage was adjusted at \$8,000 per one car garage and \$1,000 per one car carport. Condition was adjusted at \$27.00 per sq.ft. rounded for C3 condition and at \$20 per square. Please see addendum for a detailed explanation of the methodology utilized to develop site value and site adjustments and GLA Adjustments addendum for details on GLA adjustments.

I certify, as the appraiser, that I have complied with the "AIR" in all aspects of the appraisal process.

The Approximate Land Value Is \$41,000.

The Cost Approach

The cost approach may be defined as the reproduction cost of the improvements new, less accrued depreciation, plus land value. This appraiser has gathered current cost information from local contractors actively engaged in building similar properties in the area and compared these cost to known costs published in cost manuals. After comparing the local contractors and cost manuals, the appraiser has modified the cost to produce the most realistic reproduction cost for the subject property. Due to constant market changes in cost of building supplies, replacement of reproduction cost, the Cost Approach may not be relied upon as an indicator of value and should only be relied upon as of the effective date of this appraisal.

Income Approach to Value

The income approach is the second approach used to estimate market value. It is the most effectively used with properties that are intended to produce income. Since single family residences are normally built or purchased to obtain income, the income approach is not a reliable method to use in appraising a single family residence. The typical purchaser of a residence is not looking for a return on the investment in a monetary way; rather, he or she is interested in the amenities or intangibles the investment may bring.

The Sales Comparison Approach

In the sales comparison approach, the appraiser's objective is to find the probable market value of the subject property by interpreting data on sales of similar properties. Each comparable sale is compared with the subject property. Typically, the elements of comparison included date of sale, location, physical characteristics, terms of financing, and conditions of sale. Adjustments are made to the comparables sales to arrive at an indication of what the subject property would sell for if offered in the market.

Adverse Environmental Conditions

The appraiser has not been informed, nor has the appraiser any knowledge of the existence of any environmental or health impediment which, if known, could have a negative impact on the market value of the subject property. The valuation contained herein is not valid if any hazardous items are found in the subject property and not stated within the appraisal report, including but not limited to: urea-formaldehyde foam insulation, radon gas, adverse asbestos products, lead or lead based products, toxic waste contaminants. The detection of these materials is beyond the qualifications of the appraiser, and beyond the scope of this appraisal. The appraiser was not aware of, nor was he made aware of, the presence of toxic waste and/or hazardous material, contaminated soil, and/or land fill(s) in, on, or located near the subject property.

Flood Zone Description

Flood Zones "C", "B", and "X" are not considered Flood Hazard Areas by FEMA. Flood zones "A", "A#", or "V" or "V#" are considered areas of Flood Hazard. Flood insurance is required for areas of Flood Hazard. "C" and "X" are interchangeable. The appraiser always defers to a qualified surveyor's estimate of flood elevation. Flood determination information is derived from FEMA maps and online data services. The appraiser is not a licensed surveyor or similarly qualified party. **Flood elevations cannot be guaranteed and are merely provided as estimates.** One should realize also that the different flood zones are governmental definitions of elevation and do not guarantee degrees of inundation in potential flood situations.

Appraiser's Inspection

The appraiser's inspection of the appraised property specifically addresses physical conditions of the property that may render the property uninhabitable or cause health and safety concerns. **An appraiser's examination of a property is not a substitute for a home inspection by a qualified professional home inspector.** Appraisals are not intended to protect the buyer: they protect the lender. Owners and buyers need to secure their own home inspection through the services of a qualified inspector and satisfy themselves about the condition of

Fadiel Razkalla

Supplemental Addendum

File No. L10102508

Borrower	N/A		
Property Address	616 Lenwood Dr		
City	Slidell	County	Saint Tammany
Lender/Client	Fadiel Razkalla	State	LA
		Zip Code	70458

the property. The appraiser is not a qualified termite inspector. An examination of the appraised property by a reputable licensed termite company is always recommended, particularly in the case of ground level construction or in the case of any structure where the wood touches ground. The appraiser will not trespass to take comparable photographs. An exterior inspection of the comparables is made only to the extent that the appraiser feels comfortable.

Highest and Best Use

Highest and Best Use is that reasonable and probable use that will support the highest present value, as defined, as of the effective date of the appraisal. Alternatively, it is that use, from among legally permissible, physically and reasonably possible uses, found to be economically and financially feasible, and which results in the most profitable of the alternatives. Given the current zoning, location and size of the site, surrounding land uses (recognizing the Principle of Conformity) and development characteristics of the market area, our opinion of the highest and best use of the property "as vacant" is for single family residential development. Further, the existing use/improvements exceed the value of the vacant site, therefore, our opinion of the highest and best use of the site "as improved" is for continued single family residential use.

Inspection Disclaimer

This appraisal/inspection is not a home inspection, building inspection, environmental inspection, structural inspection, or pest inspection. In the process of appraising this property and by preparing this appraisal report, the appraiser is not acting as a home inspector, building inspector, environmental inspector, structural engineer, or pest inspector.

In performing the limited inspection of this property, areas that were readily accessible were visually observed from ground level and the appraisers' review is superficial only. Additionally, the appraiser does not fully inspect the electrical system, the plumbing system, mechanical systems, foundations system attic, sub floor or crawl space. It is of further note that the appraiser does not move any furniture, equipment or fixtures during the site visit. The appraiser is not an expert in construction or construction materials and the purpose of this report is to make an economic evaluation of the subject property only. The appraisers' inspection is not technically exhaustive and does not offer warranties or guarantees of any kind. It is advised any interested parties have the appropriate inspections performed by licensed and or certified inspectors with attendant warranties and or guarantees.

It is further advised any possible adverse or negative conditions that may exist be inspected by the appropriate and or licensed individuals.

Condition Of Appraisal

On the comparable sales used, the date of the sales/time used in the appraisal report are the (sale date) and not (contract date). As of the date of the appraisal, I have completed the requirements of the continuing education program of the Louisiana Certified Appraiser's law and am currently certified under the law as a Louisiana State Certified Residential Real Estate Appraiser through December 31, 2025 saving certificate number R1655. This appraisal conforms to the Code of Ethics of the National Association of Review Appraisers and the Uniform Standards of Professional Appraisal Practice.

Digital Signatures

The signature(s) affixed to this report were applied by the original appraiser(s) or supervisory appraiser and represent their acknowledgements of the facts and opinions found in this report. These signatures were applied using a password, and they digitally secured to the report from any changes and alterations. hence, these signatures have the same validity as a hand written signature. This comment does not apply if the signature(s) are hand written. According to Section 3406 of the Louisiana Appraisal Law, Signatures are to be labeled Louisiana Certified Residential Real Estate Appraiser R1655 and labeled herein.

Floor Plan

The floor plan included in this report does not show any functional inadequacies, thus no functional obsolescence is assigned to the subject.

If a party other than the intended recipient receives this e-mail, you are requested to instantly notify us of the erroneous delivery and return to us all data so delivered.

The Appraiser physically measured the subject property according to ANSI Z765-2021 Standard. Sketch dimensions reported are the exact exterior dimensions rounded to the nearest 10th of a foot or nearest inch. Dimensions are not rounded to the nearest whole or half foot. Square footage is reported to the nearest whole number.

The subject property has been measured according to ANSI standards, guidelines, and requirements. The appraiser has completed the 7 hour ANSI Home Measurements, & the Power of Price-Square-Foot CE course. In addition, the appraiser has completed The 7 hour Public Records, Square Footage & Real Estate Information Crisis CE Course.
